

# ERP100-eT: Ross ERP: iBrowser & Thin Client Navigation Fundamentals

## Overview

This three-hour online training course is designed to educate those individuals using Ross ERP and to provide a basic understanding of the IAF iBrowser and Thin Client. It includes an overview of the components and the various platform tools available within both interfaces.

After taking this course, students should be able to modify their iBrowser interface and navigate within iBrowser and Thin Client in preparation for using Ross ERP. During this session, students will also perform exercises using the various help tools and data entry conventions.

## Audience

Users of Ross ERP

## Prerequisites

Familiarity with Microsoft Windows

---
